

SECM - Security Maintenance

This screen is used to list the access that each staff type has for the screens in the CAPS system. Only the workers responsible for maintaining the screen security will be able to update this screen. For all other workers, this screen will be inquiry only.

FS900001 NEW INFORMATION DISPLAYED . PATH:

Field Descriptions (F12) indicates code lookup is available.

STAFF TYPE (F12)

Enter the code for the staff type you want to view screen security for.

SCREEN NAMES

These fields will display the type of access the entered staff type will have for that specific screen. Screens marked with an “R” indicate that staff type has “read only” access to the screen. Screens marked with a “W” indicate that staff type has “write” access to that screen. Fields that are blank indicate that staff type has no access to the screen at all.

Additional Information

Client, report and provider security are still in effect – for example, if a staff type has “write” access to a client screen, the worker with that staff type still has to have access to the client in order to access that screen.
