

Go to the SUPERSESSION MAIN MENU where you typically select CICS to access CAPS. At the top of the screen, TAB right in front of OPTIONS, type an X and press ENTER. This Product Options box will appear:

On the select line where the cursor will be sitting, type a 1 or a T (you will be setting up a trigger key.) This Update Current Trigger Profile box will appear (your list may be different, that is OK):

On the first select line, type a forward slash (/), then press ENTER.

This Action Codes box will appear:

```
KLSTACT1      Action Codes

Select an action for trigger "@p ENTER"
and then press ENTER.

a █ I display trigger information
  A add a trigger
  M modify trigger
  D delete trigger
  L add from Global trigger list

Command ==>
Enter F1=Help F12=Cancel
```

Type an A on the select line and press ENTER. This Add a Trigger box will appear:

```
KLSTINS1      Add a Trigger

Enter the following information then press ENTER

Phrase..... \s          (any 8)
Key..... ENTER +

Dialog name.... KLGMSG11
Parameter.....          (any 24)

Command ==>
